# At 3M, we apply science to improve lives

[3M's 2022 Global Impact Report \(PDF, 70.1 MB\)](#)

## It starts with purpose

3M has always been a place where ideas, and science to realize them, drive our purpose to our performance.

Purpose drives our performance. We are committed to creating societal value through our environmental, social and governance (ESG) commitment framework within which we operate, and the expectations of our stakeholders.

More than ever, we need resilience to thrive. The resilience of our planet and our communities is essential to our success.

As the expectations of our stakeholders continue to increase, we set meaningful and ambitious goals to drive progress.

We are committed to improving and improving our environmental performance. Our Scope 1 and Scope 2 greenhouse gas goal of 50% renewable energy by 2030 is a key goal to reduce the carbon footprint of our operations.

We back initiatives that protect threatened ecosystems, promote science-based solutions, and bring our full capabilities to bear on the challenges of our communities. We believe in the power of science to drive meaningful change.

Our corporate governance framework, our commitment to our stockholders, our commitment to our employees, our commitment to the public trust, and our unwavering integrity are the foundation of our success.

## Highlights

Learn about our products, technologies, partnerships, and goal progress: [2022 Global Impact Highlights](#) (PDF, 13.3 MB). For full details: [2022 Global Impact Report](#) (PDF, 70.1 MB).

## Environmental

## Social

## Governance

We see the opportunity to direct our efforts to areas where 3M can make the biggest impact. These areas are within the three pillars of our [Strategic Sustainability Framework](#).

## A message from our leadership

## How we deliver on our commitments and determine our priority topics

### Corporate governance

The concept of risk appetite and tolerance is an essential component of our strategic planning, and it is the responsibility of our senior business leaders to plan accordingly. We firmly believe that good corporate governance practices serve the long-term interests of our stockholders, strengthen 3M's Board of Directors and management, and further enhance the public trust 3M has earned from more than a century of operating with unwavering integrity and doing business the right way.

### Stakeholder engagement

3M's stakeholder engagement strategy on priority topic areas continues to evolve. We continually look to our stakeholders to help us increase our understanding, broaden our awareness, seek technical input and expertise, and evaluate possible collaborations and strategic partnerships.

## Our Strategic Sustainability Framework

Our Strategic Sustainability Framework helps us apply science to improve lives. The three pillars of Science for Circular, Science for Climate, and Science for Community help guide [our business decisions and strategy](#), as well as how we focus our efforts on local and global community impact. Our Sustainability Goals are all underpinned by these three areas of focus:

Science for Circular

Design solutions that do more with less material, advancing a global circular economy.

Science for Climate

Innovate to decarbonize industry, accelerate global climate solutions and improve our environmental footprint.

Science for Community

Create a more positive world through science and inspire people to join us.
